

What's Developing

June 17-21 is National Small Business Week. That designation recognizes the critical contributions of America's entrepreneurs and small business owners. Statistics show that more than half of Americans either own or work for a small business, and they create about two out of every three new jobs in the US each year.

Eureka is fortunate to have so many small businesses that provide goods and services to those in this whole region of the state. Thank you for all that you have done to make Eureka what it is today.
